

A student told you that plants have fruits only to support humans so we do not starve. This is how plants support our society. Can you explain why plants have fruit and also 3 other ways plants help our communities?

- A student explained that many flowers can reproduce without any help. They say they have both male and female parts so they need nothing else to be successful. Are they correct? Can you help further explain how flowers reproduce?

Your little sister opened up a dark bag of potatoes and found a potato that looked just like this. She was terrified of this vampire potato. Can you explain to her this is a normal potato and she does not need to worry?

Concepts

There is a hill near your house that is all dirt. You know there is heavy rains going to happen each summer that could severely damage the hill. What steps could the community take to help support this hill from eroding each year? Can you draw a diagram to support your ideas?
